Do not operate this equipment unless you have read and understood the contents of this manual! Failure to follow the instructions contained in this manual may result in serious injury or death. This manual contains important safety information concerning the maintenance, use, and operation of this product. If you're unable to understand the contents of this manual, please bring it to the attention of your supervisor. Keep this manual in a safe location for future reference.

WARNING

No opere este equipo al menos que haya leído y comprendido el contenido de este manual! Cualquier falla en el seguimiento de las instrucciones contenidas en este manual puede resultar en un serio lesión o muerte. Este manual contiene importante información sobre seguridad concerniente al mantenimiento, uso y operación de este producto. Si usted no puede entender el contenido de este manual por favor pregunte a su supervisor. Almacene este manual en una localización segura para la referencia futura.

ADVERTENCIA

Ne pas utiliser cet équipement sans avoir lu et compris le contenu de ce manuel ! Le non-respect des instructions contenues dans ce manuel peut entraîner de graves blessures ou la mort. Ce manuel contient des informations importantes concernant l'entretien, l'utilisation et le fonctionnement de ce produit. Si vous ne comprenez pas le contenu de ce manuel, veuillez le signaler à votre supérieur. Conservez ce manuel dans un endroit sûr pour pouvoir vous y référer plus tard.

INTRODUCTION

Ovention® Conveyor Ovens set a new standard in cooking quality, speed, flexibility, and efficiency. A new discovery in air handling not only speeds the cooking process, but “scrubs” and recirculates the air through the oven—eliminating the need for a hood system in most installations (non-catalyst [NC] models require a hood system). Using an icon-driven touchscreen controller, operators can choose, edit, and develop custom conveyor settings easily. These settings can be developed to include varying heat profiles, upper and lower air velocity settings, and timing. Ovention Conveyor Ovens are designed specifically for ease of operation and high throughput.

Ovention Conveyor Ovens are products of extensive research and field testing. The materials used were selected for maximum durability, attractive appearance, and optimum performance. Every unit is inspected and tested thoroughly prior to shipment.

This manual provides the installation, safety, and operating instructions for Ovention Conveyor Ovens. Ovention recommends all installation, operating, and safety instructions appearing in this manual be read prior to installation or operation of the oven.

Safety information that appears in this manual is identified by the following signal word panels:

WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE is used to address practices not related to personal injury.
IMPORTANT SAFETY INFORMATION

Read the following important safety information before using this equipment to avoid serious injury or death and to avoid damage to equipment or property.

**WARNING**

**ELECTRIC SHOCK HAZARD:**
- Plug unit into a properly grounded electrical receptacle of the correct voltage, size, and plug configuration. If plug and receptacle do not match, contact a qualified electrician to determine and install proper voltage and size electrical receptacle.
- Unit must be grounded properly. Failure to ground unit properly could result in serious personal injury or death.
- Turn off Standby switch, allow unit to cool, and unplug unit/tum OFF Main Disconnect switch before performing any cleaning, adjustments, or maintenance.
- DO NOT submerge or saturate with water. Unit is not waterproof. Do not operate if unit has been submerged or saturated with water.
- Unit is not weatherproof. Locate unit indoors where ambient air temperature is a minimum of 70°F (21°C).
- Do not steam clean or use excessive water on unit.
- Do not attempt to repair or replace a damaged power cord. Cord must be replaced by an Authorized Ovention Service Agent or a person with similar qualifications.
- This unit must be serviced by qualified personnel only. Service by unqualified personnel may lead to electric shock or burn.
- Do not clean unit with metal scouring pads. Metal pieces can break off pad and touch electrical components, creating risk of electric shock.
- Do not pull unit by power cord.
- Keep power cord away from heated surfaces.
- Do not allow power cord to hang over edge of counter.
- Do not move or relocate unit for cleaning. Unit is bulky and heavy. Do not lay unit on front or back side. Damage to unit could occur.
- Airflow restriction will cause oven to overheat.
- Do not heat sealed containers or products such as whole eggs in oven. These items may explode.
- Do not store any materials or items inside oven chamber when not in use.
- Improper cleaning of oven could damage catalyst and will void unit warranty.

**WARNING**

This oven is designed specifically to heat or cook—NOT for industrial or laboratory use.

In the event of emergency, turn OFF Main Disconnect switch.

Make sure all operators have been instructed on the safe and proper use of the unit.

This unit is not intended for use by children or persons with reduced physical, sensory, or mental capabilities. Ensure proper supervision of children and keep them away from the unit.

This unit has no “user-serviceable” parts. If service is required on this unit, contact an Authorized Ovention Service Agent or contact the Ovention Hotline at 855-298-6836.

**BURN HAZARD:**
- Some exterior surfaces on unit will get hot. Avoid unnecessary contact with unit.
- Pan/tray will be very hot upon removal—use oven mitt, pan gripper, or other utensil to remove.

Do not turn off Main Disconnect switch or unplug unit immediately after use. Internal fans must cool oven to avoid damage to electrical components.

Locate unit at proper counter height in an area that is convenient for use. Location should be level to prevent unit or its contents from falling accidentally and strong enough to support the weight of the unit and contents.

DO NOT lift unit by conveyor frame on each side of oven chamber. Conveyor is not designed to support weight of unit. Lift from underneath oven chamber only.

Do not move or relocate unit for cleaning. Unit is bulky and heavy.

Do not place anything on top of unit; doing so may subject personnel to injury or could damage unit.

Do not heat sealed containers or products such as whole eggs in oven. These items may explode.

Do not store any materials or items inside oven chamber when not in use.

Improper cleaning of oven could damage catalyst and will void unit warranty.

**NOTICE**

Allow a minimum clearance of 1” (25 mm) along the sides and rear of unit for proper ventilation. Do not block or cover any cabinet venting.

Do not cover racks or any other part of oven with metal foil. Airflow restriction will cause oven to overheat.

Do not lay unit on front or back side. Damage to unit could occur.

Use non-abrasive cleaners and cloths only. Abrasive cleaners and cloths could scratch finish of unit, marring its appearance and making it susceptible to soil accumulation.

Clean unit daily to avoid malfunctions and maintain sanitary operation.

Form No. OVCM-0416
MODEL DESCRIPTION

All Models

Ovention® Conveyor Ovens are designed to provide unequaled flexibility in both kitchen and front-of-the-house installations. The superior cooking control, small footprint, low heat escape, and option for hood-less installation make the Conveyor Oven a modern solution for ease of operation and high throughput.

Each Conveyor Oven is equipped with dedicated upper and lower heating elements and air blowers. The air blowers direct heated air through upper and lower jet plates inside the oven chamber, above and below the food. A conveyor belt moves product continuously from one side of the conveyor, through the oven chamber, to the opposite side of the conveyor.

Operator controls consist of a touchscreen, a Standby switch, and a Main Disconnect switch. Adjustable door panels on each side of the oven chamber can be used to customize the chamber opening height. Two removable crumb trays, one below each side of the conveyor, allow for easy cleanup. A USB port allows the uploading of pre-programmed menu items, installation of software updates, and opportunity for service diagnostics. A 6’ (1829 mm) cord and plug set is standard.

Model C2000

Model C2000 is a standard, single belt conveyor oven. It has a 20” (508 mm) conveyor belt that can be set to cook from left-to-right or right-to-left.

Model C2600

Model C2600 has three different conveyor oven configurations—single belt, 50/50 split belt, and 70/30 split belt. The split belt models allow two different cook durations (belt speeds) to be running at the same time.

The single belt model has a 26” (659 mm) conveyor belt that can be set to cook from left-to-right or right-to-left.

The 50/50 split belt model has two separate 12” (304 mm) conveyor belts. Each can be operated independently and can be set to cook from left-to-right or right-to-left.

The 70/30 split belt model has a 17” (431 mm) conveyor belt and a 8” (203 mm) conveyor belt. Each can be operated independently and can be set to cook from left-to-right or right-to-left.

**Model Designation**

Oven Type:
C = Conveyor

- **Model Number:**  
  - C2000 = 20” x 20” Cavity With Catalyst  
  - C2000NC = 20” x 20” Cavity, No Catalyst  
  - C20003PH = 20” x 20” Cavity, With Catalyst, 3 Phase  
  - C2600 = 20” x 26” Cavity With Catalyst

---

**Specifications**

**Plug Configurations**
Units are equipped with an electrical cord and plug appropriate for the electrical rating of the unit. Unit must be connected to a dedicated circuit.

**WARNING**

**ELECTRIC SHOCK HAZARD:** Plug unit into a properly grounded electrical receptacle of the correct voltage, size, and plug configuration. If plug and receptacle do not match, contact a qualified electrician to determine and install proper voltage and size electrical receptacle.

**Plug Configurations**

- NEMA 6-50P
- NEMA 15-50P

*NOTE: Receptacle not supplied by Ovention.*

General
Ovention® Conveyor Ovens are shipped with most components pre-assembled. Care should be taken when unpacking shipping carton to avoid damage to the unit and components enclosed.

WARNING
ELECTRIC SHOCK HAZARD: Unit is not weatherproof. Locate unit indoors where ambient air temperature is a minimum of 70°F (21°C).

FIRE HAZARD: Locate unit a minimum of 1” (25 mm) from combustible walls and materials. If safe distances are not maintained, discoloration or combustion could occur.

CAUTION
Locate unit at proper counter height in an area that is convenient for use. Location should be level to prevent unit or its contents from falling accidentally and strong enough to support the weight of the unit and contents.

NOTICE
Do not lay unit on front or back side. Damage to unit could occur.

NOTE: Due to the size and weight of the Conveyor Oven, use the proper number of people for installation based on the weight of the oven.

1. Inspect the shipping container for obvious signs of transit damage. If damaged, inform the freight company immediately. CAUTION! Stop! Do not attempt to use oven if damaged. Contact Ovention for assistance.

2. Cut and remove the shipping bands from around the oven packaging.

3. Remove tape and protective packaging from all surfaces of the unit.

4. Remove crumb trays and conveyor end stops from packaging.

5. Inspect the oven for freight damage such as dents in the end caps or inside the oven chamber. If damaged, inform the freight company immediately.

CAUTION
DO NOT lift unit by conveyor frame on each side of oven chamber. Conveyor is not designed to support weight of unit. Lift from underneath oven chamber only.

6. Place the unit in the desired location. Make sure to lift from underneath the front and rear of the oven chamber only.
   - Locate the unit in an area where the ambient air temperature is constant and a minimum of 70°F (21°C).
   - Make sure the unit is at the proper counter height in an area convenient for use.
   - Make sure the countertop/table is level and strong enough to support the weight of the unit and food product.
   - Position the unit with a minimum 1” (25 mm) clearance at the back and on either side for proper venting.
   - Make sure all the feet on the bottom of the unit are positioned securely on the countertop/table.

7. Install a crumb tray underneath each side of the conveyor.
   - Slide the tray underneath the conveyor and above the tray support located below the conveyor frame.
   - Position the two hooks on the tray into the holes at the end of the conveyor frame.

8. Install a conveyor end stop at each end of the conveyor frame.
   - Position the two hooks on the end stop over the conveyor frame while aligning the cutouts with the crumb tray hooks.

9. Plug the unit into a properly grounded electrical receptacle of the correct voltage, size, and plug configuration. See the SPECIFICATIONS section for details.

NOTE: The oven is suitable for either 208 VAC or 240 VAC and will adjust automatically to the voltage being supplied.
**OPERATION**

**General**
Use the following information and procedures to operate an Ovention® Conveyor Oven.

⚠️ **WARNING**
Read all safety messages in the IMPORTANT SAFETY INFORMATION section before operating this equipment.

In the event of emergency, turn OFF Main Disconnect switch.

⚠️ **CAUTION**
BURN HAZARD: Some exterior surfaces on unit will get hot. Avoid unnecessary contact with unit.

Use caution and be aware of pinch points when slider assembly is moving.

**Conveyor Setting Information**
Conveyor Ovens are designed to provide unequaled flexibility and efficiency. Each oven has the capability of storing 36 different conveyor settings. All conveyor settings appear on the Select Desired Item screen, which has eight additional sub-screens.

At initial startup, the Select Desired Item screen will show either sample conveyor settings or customer-specific, preloaded conveyor settings. If the Select Desired Item screen shows sample conveyor settings, these settings can be used to help develop specific conveyor settings appropriate for the installation. Refer to the “Programming Conveyor Settings” procedure in this section for instructions on creating conveyor settings.

**Startup**
1. Make sure the Main Disconnect switch is in the ON (I) position.

   **NOTE:** The Conveyor Oven can be set up to cook from left-to-right or right-to-left. This manual is written to reflect an oven set to cook from left-to-right. The conveyor belts on split belt models can travel in the same direction only.

2. Move the Standby switch up to the “On” position.
   - The touchscreen will energize and show the name of the oven and current software version for a few seconds.

• After the Startup Screen, the Select Desired Item screen appears. The first four pre-set conveyor settings are available on this screen.

   ![Select Desired Item Screen—Single Belt Model](image)

   Touch to scroll to next screen and view additional conveyor settings.

3. Touch the desired conveyor setting.
   - The oven heaters, air blowers, and cooling fans will start up. Allow 10–15 minutes for the oven to reach setpoint temperature.
   - The touchscreen shows the selected setpoint temperature and the current cavity temperature.

**Startup Screen**

![Startup Screen](image)

**Preheat Screen**

When the oven reaches setpoint temperature, the oven begins a temperature stabilizing period (a countdown screen appears).

![Preheat Screen](image)

**Oven Stabilizing Screen**

After the oven temperature stabilizes, the conveyor belt begins moving and the Select Desired Item screen appears on the touchscreen. The oven is now ready for cooking.

**NOTE:** The conveyor settings shown are for example only. Depending on the configuration of the oven, the Select Desired Item screen will show either sample settings or customer-specific, preloaded settings.

![Oven Stabilizing Screen](image)
Cooking—Single Belt

Use the following procedure to operate a single belt model and cook items continuously.

1. Make sure the oven has reached setpoint temperature. The Select Desired Item screen will appear on the touchscreen.

2. Using a paddle, pan gripper, or other utensil, place food product onto the conveyor belt on the left side of the conveyor assembly.
   - Continue loading food product as needed.

3. Using a paddle, pan gripper, or other utensil, remove cooked food product from the right side of the conveyor assembly.

   **CAUTION**
   **BURN HAZARD:** Pan/tray will be very hot upon removal—use oven mitt, pan gripper, or other utensil to remove.

4. If a different conveyor setting is required during operation, touch the desired setting on the Select Desired Item screen.

   **NOTE:** If the new conveyor setting temperature is different than the original temperature, the oven will need a few minutes to adjust to the new temperature.

Cooking—Split Belt

Use the following procedure to operate a split belt model and cook items continuously.

1. Make sure the oven has reached setpoint temperature. The Select Desired Item screen will appear on the touchscreen.

2. Using a paddle, pan gripper, or other utensil, place food product onto the front or back conveyor belt on the left side of the conveyor assembly.
   • Continue loading food product as needed.

3. Using a paddle, pan gripper, or other utensil, remove cooked food product from the right side of the conveyor assembly.

   **CAUTION**
   **BURN HAZARD:** Pan/tray will be very hot upon removal—use oven mitt, pan gripper, or other utensil to remove.

4. If a different conveyor setting is required during operation, touch the desired setting on the Select Desired Item screen.

   **NOTE:** If the new conveyor setting temperature is different than the original temperature, the oven will need a few minutes to adjust to the new temperature.

Shutdown

1. Move the Standby switch down to the “Off” position.
   - The oven heaters, touchscreen, and conveyor belt will shut off.
   - The air blowers and cooling fans will continue to operate until the oven chamber temperature drops below 140°F (60°C).

   **CAUTION**
   **Do not turn off Main Disconnect switch or unplug unit immediately after use. Internal fans must cool oven to avoid damage to electrical components.**
PROGRAMMING CONVEYOR SETTINGS

Use the following procedure to edit or create conveyor settings. This procedure requires access to password-protected screens and should be performed by authorized personnel only.

NOTE: The USB port allows the uploading of pre-programmed conveyor settings from an external USB drive. Refer to the “Uploading from a USB Drive” procedure in this section for details.

1. From the Select Desired Item screen, touch the “up” arrow.
   • A password keypad will appear on the touchscreen.
2. Input the password using the keypad, and touch ENTER.
   • The Admin mode screen will appear on the touchscreen.
3. Touch RECIPES to access the Recipe Development screen.
   a. The Recipe Development screen will appear. This screen will look like the Select Desired Item screen.
4. Edit or create a conveyor setting.
   • To edit an existing conveyor setting, touch the desired setting.
   • To create a new conveyor setting, touch an empty box. If no empty boxes are available, touch the “down” arrow to scroll to the next screen.
   • The Edit Preset Data screen will appear.
5. Touch each “setting” box on the Edit Preset Data screen to edit the corresponding setting. Common settings include item name, top blower percentage, bottom blower percentage, and cook temperature. For cook duration: single belt models will have a single COOK DURATION box; split belt models will have a FRONT BELT box and a BACK BELT box.
   • Touching a “setting” box will bring up a keypad specific to the setting. Enter the desired value using the keypad, then touch ENTER to return to the Edit Recipe Settings screen.
   • Menu item names can have up to 16 characters.
6. When conveyor setting programming is complete, touch SAVE AND EXIT on the Edit Preset Data screen.
   • The Recipe Development screen will appear.
   • To program additional menu items, repeat steps 4 and 5 of this procedure.
7. If all programming is complete, touch the “up” arrow on the first (screen 1 of 9) Recipe Development screen to return to the Admin Mode screen.
OPERATION

Changing Temperature Unit of Measure
Use the following procedure to change the temperature unit of measure between fahrenheit and celsius. This procedure requires access to password-protected screens and should be performed by authorized personnel only.

1. From the Select Desired Item screen, touch the "up" arrow.
   • A password keypad will appear on the touchscreen.
2. Input the password using the keypad, and touch ENTER.
   • The Admin Mode screen will appear on the touchscreen.
3. Touch MAINT to access the Maintenance Mode screen.

   Touch to access Sound Settings screen.
   Touch to access Set Time/Date screen.
   Touch to access Oven Configuration screen.
   Touch to return to Admin Mode screen.

4. Touch CONFIG on the Maintenance Mode screen. The Oven Configuration screen appears.
5. Touch TEMP MODE on the Oven Configuration screen to toggle the unit of measure between fahrenheit and celsius.

   Touch to toggle between fahrenheit and celsius.

   Touch to return to Maintenance Mode screen.

Uploading from a USB Drive
Use the following procedure to upload pre-programmed menu items or firmware updates from an external USB drive. This procedure requires access to password-protected screens and should be performed at oven startup by authorized personnel only.

1. Move the Standby switch up to the "On" position.
   • The touchscreen will energize. After the Startup Screen, the Select Desired Item screen appears.
2. Remove the cover from the USB port above the Standby switch, and insert the USB drive into the port.
3. From the Select Desired Item screen, touch the "up" arrow.
   • A password keypad will appear on the touchscreen.
4. Input the password using the keypad, and touch ENTER.
   • The Admin Mode screen will appear on the touchscreen.
5. Touch USB to access the USB Functions screen.

   Touch to upload touchscreen firmware update.
   Touch to upload relay firmware update.
   Touch to upload pre-programmed menu items.

6. Touch the desired function to begin the corresponding upload.
   • Select the upload file from the list that appears.
   • A screen will appear to indicate that the upload is in progress.
   • When the upload is complete, the oven will restart.
7. When the startup screens reappear, remove the USB drive from the USB port, and replace the port cover.
8. Perform the normal “Startup” procedure at the beginning of this section to use the oven.
MAINTENANCE

General
Ovention® Conveyor Ovens are designed for maximum durability and performance with minimum maintenance.

**WARNING**

ELECTRIC SHOCK HAZARD:
- Turn off Standby switch, allow unit to cool, and unplug unit/turn OFF Main Disconnect switch before performing any cleaning, adjustments, or maintenance.
- DO NOT submerge or saturate with water. Unit is not waterproof. Do not operate if unit has been submerged or saturated with water.
- Do not steam clean or use excessive water on unit.
- This unit is not “jet-proof” construction. Do not use jet-clean spray to clean this unit.
- Do not clean unit when it is energized or hot.
- Do not clean unit with metal scouring pads. Metal pieces can break off pad and touch electrical components, creating risk of electric shock.
- This unit must be serviced by qualified personnel only. Service by unqualified personnel may lead to electric shock or burn.
- Use only Genuine Ovention Replacement Parts when service is required. Failure to use Genuine Ovention Replacement Parts will void all warranties and may subject operators of the equipment to hazardous electrical voltage, resulting in electrical shock or burn. Genuine Ovention Replacement Parts are specified to operate safely in the environments in which they are used. Some aftermarket or generic replacement parts do not have the characteristics that will allow them to operate safely in Ovention equipment.

This unit has no “user-serviceable” parts. If service is required on this unit, contact an Authorized Ovention Service Agent or contact the Ovention Hotline at 855-298-6836.

**CAUTION**

Do not move or relocate unit for cleaning. Unit is bulky and heavy.

Never use steel pads, wire brushes, or scrapers to clean unit.

Wear protective rubber gloves and protective eyewear when cleaning unit.

Improper cleaning of oven could damage catalyst and will void unit warranty.

**IMPORTANT NOTE:**

Use of cleaning chemicals not approved by Ovention when cleaning the oven chamber will void the warranty.

Daily Cleaning
To maintain performance and preserve the finish of the Ovention Conveyor Oven, clean the unit daily.

**CAUTION**

Do not turn off Main Disconnect switch or unplug unit immediately after use. Internal fans must cool oven to avoid damage to electrical components.

**NOTICE**

Use non-abrasive cleaners and cloths only. Abrasive cleaners and cloths could scratch finish of unit, marring its appearance and making it susceptible to soil accumulation.

1. Turn off the Standby switch and allow unit to cool. Cooling fans will operate until the oven chamber temperature drops below 140°F (60°C).
2. After the cooling fans shut off, move the Main Disconnect switch to the OFF (O) position.
3. Remove and discard any remaining food product.
4. Remove any spillages using damp paper towel or a non-abrasive cloth.
5. Remove and clean each conveyor end stop using a damp paper towel.
6. Remove and clean each conveyor end stop using a damp paper towel.
7. Remove and clean each crumb tray.
   - Brush crumbs into a waste container.
   - Clean the tray using damp paper towel.
8. Reinstall the crumb trays and conveyor end stops (see OPERATION section for details).
9. Wipe down all exterior surfaces using a non-abrasive, damp cloth (a non-abrasive cleaner may be used for difficult stains).
10. Polish the exterior surfaces of the oven using a good quality stainless steel cleaner.

Monthly Cleaning

1. Turn off the Standby switch and allow unit to cool. Cooling fans will operate until the oven chamber temperature drops below 140°F (60°C).
2. After the cooling fans shut off, move the Main Disconnect switch to the OFF (O) position.

Cleaning the Air Filters

Use non-abrasive cloths and cloths only. Abrasive cleaners and cloths could scratch finish of unit, marring its appearance and making it susceptible to soil accumulation.

1. Turn off the Standby switch and allow unit to cool. Cooling fans will operate until the oven chamber temperature drops below 140°F (60°C).
2. After the cooling fans shut off, move the Main Disconnect switch to the OFF (O) position.
3. Reinstall the crumb trays and conveyor end stops (see OPERATION section for details).
4. Wipe down all exterior surfaces using a non-abrasive, damp cloth (a non-abrasive cleaner may be used for difficult stains).
5. Polish the exterior surfaces of the oven using a good quality stainless steel cleaner.
3. Remove and clean the two air filters on the back of the oven. To clean each filter:
   a. Slide the filter straight out the side of the filter bracket.
   b. Spray the filter with water and/or soak in mild soap and water.
   c. Rinse clean and allow the filter to air dry.
   d. When the filter is dry, reinstall the filter into the filter bracket.

**IMPORTANT NOTE:**
Use of cleaning chemicals not approved by Ovention when cleaning the oven chamber will void the warranty.

4. Remove and clean the upper and lower jet plates inside the oven chamber. To clean the jet plates:
   a. Unlatch and open the oven door so that the inside of the oven chamber is exposed.
   b. Remove each plate by gripping the two tabs on each plate and pulling straight out of the oven.
   c. Spray Chemco Dirt Buster III Oven Cleaner onto both sides of each jet plate. Allow the cleaner to sit for 3–5 minutes.
   d. Using a non–abrasive nylon scouring pad, apply pressure to wipe away grease residue.
   e. Wipe the jet plates clean using a damp, non-abrasive cloth and allow to air dry. Do not reinstall at this time.

5. Clean the visible areas of the oven chamber using the same procedure as the jet plates (steps “c” through “e” above).

6. Reinstall the upper and lower jet plates into the oven chamber.

7. Close the oven door and secure both door latches.

8. Remove and clean each conveyor end stop and crumb tray as described in the “Daily Cleaning” procedure.

9. Remove the belt guard(s) and disengage the drive belt(s). Split belt models have a drive belt behind each side of the conveyor frame.
   a. Slide the belt guard off the drive belt located behind the conveyor frame.
   b. Remove the drive belt from the drive wheel by slightly lifting the conveyor frame.

10. Clean the belt guard using mild soap and water. Rinse clean and dry using a non-abrasive cloth.

11. For split belt models only, remove the oven door to allow removal of the conveyor belt assembly.
   a. Remove the two screws that secure the cover plate and upper door hinge to the oven door.
   b. Disconnect the wire harness connectors located behind the cover plate, inside the door.
   c. While supporting the oven door, unlatch and lift the door off the lower oven hinge.
12. Remove the conveyor belt assembly. This step requires two people.

   For single belt models:
   a. With one person on each side of the oven cavity, lift up the conveyor belt assembly and slide the entire assembly to the right.
   b. When most of the conveyor belt assembly is through the oven cavity, the person on the left should move to the right side of the oven cavity and continue sliding the assembly out of the cavity.

13. Clean the conveyor belt assembly.
   a. Spray Chemco Dirt Buster III Oven Cleaner onto both sides of the conveyor belt assembly. Allow the cleaner to sit for 3–5 minutes.
   b. Using a non-abrasive nylon scouring pad, apply pressure to wipe away grease residue on the conveyor belt and frame.
   c. Spray clean with water and dry using a non-abrasive cloth. Additional air dry time may be necessary before reinstallation.

14. Reinstall the conveyor belt assembly, oven door, belt guard, crumb trays, and conveyor end stops by reversing the above procedure.

LIMITED WARRANTY

1. PRODUCT WARRANTY
Ovention®, Inc. ("Ovention") warrants the products that it Manufactures (the “Products”) to be free from defects in materials and workmanship, under normal use and service, for a period of one (1) year from the date of purchase when installed and maintained in accordance with Ovention’s written instructions or 18 months from the date of shipment from Ovention. Buyer must establish the product’s purchase date with Ovention sales representative or by other means satisfactory to Ovention in its sole discretion.

Ovention warrants the following Product components to be free from defects in materials and workmanship from the date of purchase (subject to the foregoing conditions) for the period(s) of time and on the conditions listed below:

• Ninety (90) Day Parts-Only Warranty: Replacement Parts

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR PATENT OR OTHER INTELLECTUAL PROPERTY RIGHT INFRINGEMENT. Without limiting the generality of the foregoing, SUCH WARRANTIES DO NOT COVER: Damage to touchscreens from abuse or impact; Wear items such as air filters and conveyor belts; Damage to catalyst from use of non-approved cleaning products; Product misuse, tampering or misapplication; improper installation; lack of or improper cleaning; or application of improper voltage.

2. LIMITATION OF REMEDIES AND DAMAGES
Ovention’s liability and Buyer’s exclusive remedy hereunder will be limited solely, at Ovention’s option, to repair or replacement by an Ovention-authorized service agency (other than where Buyer is located outside of the United States, Canada, United Kingdom or Australia, in which case Ovention’s liability and Buyer’s exclusive remedy hereunder will be limited solely to replacement of part under warranty) with respect to any claim made within the applicable warranty period referred to above. Ovention reserves the right to accept or reject any such claim in whole or part. Ovention will not accept the return of any Product without prior written approval from Ovention, and all approved returns shall be made at Buyer’s sole expense. OVENTION WILL NOT BE LIABLE, UNDER ANY CIRCUMSTANCES, FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, INCLUDING BUT NOT LIMITED TO LABOR COSTS OR LOST PROFITS RESULTING FROM THE USE OF OR INABILITY TO USE THE PRODUCTS OR FROM THE PRODUCTS BEING INCORPORATED IN OR BECOMING A COMPONENT OF ANY OTHER PRODUCT OR GOODS.
